**INSTRUCTIONS FOR THE USER:** these contain user advice, description of the commands and the correct procedures for cleaning and maintenance of the appliance.

**INSTRUCTIONS FOR THE INSTALLER:** these instructions are intended for the qualified technician who must perform the installation, put it into operation and test the appliance.

## 1. INSTRUCTIONS FOR USE

THIS MANUAL IS AN INTEGRAL PART OF THE APPLIANCE. IT MUST BE KEPT IN ITS ENTIRETY AND IN AN ACCESSIBLE PLACE FOR THE WHOLE WORKING LIFE OF THE APPLIANCE.

CAREFUL READING OF THIS MANUAL AND ALL THE INSTRUCTIONS THEREIN BEFORE USING THE APPLIANCE IS ESSENTIAL. INSTALLATION MUST BE CARRIED OUT BY COMPETENT PERSONS IN ACCORDANCE WITH THE REGULATIONS IN FORCE. THIS APPLIANCE IS INTENDED FOR HOUSEHOLD USE AND COMPLIES WITH THE EEC DIRECTIVES CURRENTLY IN FORCE. THE APPLIANCE HAS BEEN BUILT TO CARRY OUT THE FOLLOWING FUNCTIONS: COOKING FOOD; ALL OTHER USES ARE CONSIDERED UNSUITABLE.

THE MANUFACTURER CANNOT BE HELD LIABLE FOR USE OTHER THAN AS INDICATED.

IF THE APPLIANCE IS INSTALLED ON BOATS OR IN CARAVANS, DO NOT USE IT AS A ROOM HEATER.

DO NOT USE THIS APPLIANCE FOR HEATING ROOMS.

THIS APPLIANCE IS MARKED ACCORDING TO EUROPEAN DIRECTIVE 2002/96/EC ON WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT (WEEE).

THIS DIRECTIVE DEFINES THE STANDARDS FOR THE COLLECTION AND RECYCLING OF WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT APPLICABLE THROUGHOUT THE EUROPEAN UNION.

NEVER OBSTRUCT THE OPENINGS AND SLITS PROVIDED FOR VENTILATION AND HEAT DISPERSAL.

DO NOT REST ANY WEIGHT OR SIT ON THE OPEN DOOR OF THE APPLIANCE.

THE IDENTIFICATION PLATE WITH THE TECHNICAL DATA, SERIAL NUMBER AND BRAND NAME HAS BEEN VISIBLY AFFIXED TO THE APPLIANCE.

**DO NOT REMOVE THIS PLATE FOR ANY REASON.**

BEFORE THE APPLIANCE IS PUT INTO OPERATION, ALL THE PROTECTIVE FILMS APPLIED INSIDE OR OUTSIDE MUST BE REMOVED.

TAKE CARE THAT NO OBJECTS ARE STUCK IN THE DOOR OF THE OVEN.

THE APPLIANCE BECOMES VERY HOT INSIDE DURING USE. SUITABLE HEAT-PROOF GLOVES SHOULD BE WORN FOR ALL OPERATIONS.

## General instructions

GB-IE

DO NOT USE STEEL SPONGES AND SHARP SCRAPERS AS THEY WILL DAMAGE THE SURFACE.

USE NORMAL NON-ABRASIVE PRODUCTS, INCLUDING WOODEN OR PLASTIC UTENSILS IF NECESSARY. RINSE THOROUGHLY AND DRY USING A SOFT CLOTH OR A MICROFIBRE CLOTH.

DO NOT ALLOW RESIDUES OF SUGARY FOODS (SUCH AS JAM) TO SET INSIDE THE OVEN. IF THEY ARE ALLOWED TO SET FOR TOO LONG, THEY COULD RUIN THE ENAMEL COVERING THE INSIDE OF THE OVEN.

DO NOT USE PLASTIC KITCHENWARE OR CONTAINERS. THE HIGH TEMPERATURES INSIDE THE OVEN COULD MELT THE PLASTIC, DAMAGING THE APPLIANCE.

DO NOT USE SEALED TINS OR CONTAINERS IN THE APPLIANCE. OVERPRESSURE MAY OCCUR INSIDE THE CONTAINERS DURING COOKING, CREATING A DANGER OF EXPLOSION.

DO NOT LEAVE THE APPLIANCE UNATTENDED DURING COOKING PROCESSES WHERE FATS OR OILS COULD BE RELEASED. FATS AND OILS MAY CATCH FIRE.

DO NOT COVER THE BOTTOM OF THE OVEN WITH ALUMINIUM OR TINFOIL SHEETS DURING COOKING AND DO NOT PLACE PANS OR TRAYS ON IT TO AVOID DAMAGE TO THE ENAMELLED SURFACE.

IF THE SURFACES ARE STILL VERY HOT DURING COOKING, DO NOT POUR WATER DIRECTLY ONTO THE TRAYS. THE STEAM COULD CAUSE SEVERE BURNS AND DAMAGE TO ENAMELLED SURFACES.

ALL COOKING OPERATIONS MUST TAKE PLACE WITH THE DOOR CLOSED.

## 2. SAFETY PRECAUTIONS

REFER TO THE INSTALLATION INSTRUCTIONS FOR THE SAFETY REGULATIONS FOR ELECTRIC OR GAS APPLIANCES AND VENTILATION FUNCTIONS.

IN YOUR INTERESTS AND FOR YOUR SAFETY THE LAW REQUIRES THAT THE INSTALLATION AND SERVICING OF ALL ELECTRICAL APPLIANCES ARE CARRIED OUT BY QUALIFIED PERSONNEL IN ACCORDANCE WITH THE REGULATIONS IN FORCE.

OUR APPROVED INSTALLERS GUARANTEE A SATISFACTORY JOB.

GAS OR ELECTRICAL APPLIANCES MUST ALWAYS BE DISCONNECTED BY SUITABLY SKILLED PEOPLE.

BEFORE CONNECTING THE APPLIANCE TO THE POWER GRID, CHECK THE DATA ON THE PLATE AGAINST THE DATA FOR THE GRID ITSELF.

BEFORE CARRYING OUT INSTALLATION/MAINTENANCE WORK, MAKE SURE THAT THE APPLIANCE IS NOT CONNECTED TO THE POWER GRID.

THE PLUG TO BE CONNECTED TO THE POWER SUPPLY CABLE AND ITS SOCKET MUST BE OF THE SAME TYPE AND CONFORM TO THE REGULATIONS IN FORCE. THE SOCKET MUST BE ACCESSIBLE AFTER THE APPLIANCE HAS BEEN BUILT IN. NEVER DISCONNECT THE PLUG BY PULLING ON THE CABLE.

IF THE POWER SUPPLY CABLE IS DAMAGED, CONTACT THE TECHNICAL SUPPORT SERVICE IMMEDIATELY AND THEY WILL REPLACE IT.

IT IS OBLIGATORY FOR ALL ELECTRICAL EQUIPMENT TO BE EARTHED ACCORDING TO THE METHODS LAID DOWN BY SAFETY REGULATIONS.

IMMEDIATELY AFTER INSTALLATION, CARRY OUT A BRIEF INSPECTION TEST, FOLLOWING THE INSTRUCTIONS BELOW. SHOULD THE APPLIANCE NOT FUNCTION, DISCONNECT IT FROM THE ELECTRICITY SUPPLY AND CALL THE NEAREST TECHNICAL SUPPORT CENTRE. NEVER ATTEMPT TO REPAIR THE APPLIANCE.

NEVER PUT INFLAMMABLE OBJECTS IN THE OVEN: IF IT IS SWITCHED ON BY ACCIDENT, IT MAY CAUSE A FIRE.

DURING USE THE APPLIANCE BECOMES VERY HOT. TAKE CARE NOT TO TOUCH THE HEATING ELEMENTS INSIDE THE OVEN.

THIS APPLIANCE MAY NOT BE USED BY PEOPLE (INCLUDING CHILDREN) OF REDUCED PHYSICAL AND MENTAL CAPACITY, OR LACKING IN EXPERIENCE IN THE USE OF ELECTRICAL APPLIANCES, UNLESS THEY ARE SUPERVISED OR INSTRUCTED BY ADULTS RESPONSIBLE FOR THEIR SAFETY.

## General instructions

GB-IE

DO NOT LET CHILDREN GO NEAR THE APPLIANCE WHEN IT IS IN OPERATION OR PLAY WITH IT AT ANY TIME.

DO NOT INSERT POINTED METAL OBJECTS (CUTLERY OR UTENSILS) INTO THE SLITS IN THE APPLIANCE.

DO NOT USE STEAM JETS FOR CLEANING THE APPLIANCE.  
THE STEAM COULD REACH THE ELECTRONICS, DAMAGING THEM AND CAUSING SHORT-CIRCUITS.

DO NOT MODIFY THIS APPLIANCE.

DO NOT SPRAY ANY SPRAY PRODUCTS NEAR THE ELECTRICAL APPLIANCE WHILE IT IS IN OPERATION.  
DO NOT USE SPRAY PRODUCTS WHILE THE PRODUCT IS STILL HOT.

**The manufacturer cannot be held liable for damage to persons or things caused by failure to observe the above instructions, by interference with any part of the appliance or by the use of non-original spare parts.**

### 3. ENVIRONMENTAL RESPONSIBILITY

#### 3.1 Our environmental responsibility

---

Pursuant to Directives 2002/95/EC, 2002/96/EC and 2003/108/EC relating to the reduction of the use of hazardous substances in electrical and electronic appliances, as well as to the disposal of refuse, the crossed out bin symbol on the appliance indicates that at the end of the useful life of the product, it must be collected separately from other refuse. Therefore, at the end of the product's working life, the user must deliver it to the appropriate differentiated collection centres for electrical and electronic waste, or deliver it back to the retailer when purchasing an equivalent product, on a one-for-one basis. Adequate differentiated collection for the subsequent forwarding of the decommissioned product to recycling, processing and ecologically compatible disposal contributes to avoiding possible negative effects on the environment and on health, and promotes recycling of the appliance's constituent materials. Illicit disposal of the product by the user will lead to the application of administrative sanctions.

The product does not contain substances in quantities sufficient to be considered hazardous to health and the environment, in accordance with current European directives.

#### 3.2 Your environmental responsibility

---

Our product's packing is made of non-polluting materials, which are therefore compatible with the environment and recyclable. Please help by disposing of the packaging correctly. You can obtain the addresses of collection, recycling and disposal centres from your retailer or from the competent local organisations.

**Do not discard the packaging or any part of it, or leave it unattended. It can constitute a suffocation hazard for children, especially the plastic bags.**

Your old appliance also needs to be disposed of correctly.

**Important:** hand over your appliance to the local agency authorised for the collection of electrical appliances no longer in use. Correct disposal enables intelligent recovery of valuable materials.

Before disposing of your appliance it is important to remove doors and leave shelves in the same position as for use, to ensure that children cannot accidentally become trapped inside during play. It is also necessary to cut the connecting cable to the power grid, removing it along with the plug.

## 4. GET TO KNOW YOUR OVEN

- 1** Control panel
- 2** Roof liner (on some models only)
- 3** Oven light
- 4** Rack and tray support runners
- 5** Oven seal
- 6** Oven fan (on some models only)

## 5. AVAILABLE ACCESSORIES

### NOTE:

Some models are not provided with all accessories.

**Rack:** for holding cooking containers.

**Oven tray:** for collecting fat from foods placed on the rack above.

- Accessories available on request: Original supplied and optional accessories may be ordered from any Authorised Support Centre.
- Use original SMEG accessories only.

### 5.1 Using the rack or tray

The racks and trays are equipped with a mechanical safety lock which prevents them from being taken out accidentally. To insert the rack or tray correctly, check that the lock is facing downwards (as shown in the figure at the side). To remove the rack or tray, lift the front slightly.

**The mechanical lock must always face the back of the oven.**

Insert racks and trays fully into the oven until they come to a stop.

## 6. FRONT PANEL

All the controls and indicator lights can be seen on the front panel. The tables below describe the symbols used.

### TIMER KNOB

1

This knob enables manual cooking or the timer to be selected; the timer switches off the oven automatically at the end of cooking. **If no cooking time is selected, the timer knob must be positioned on** .

To set the cooking time, turn the knob clockwise until it reaches the “90” position and then set the desired cooking time. The numbers from 5 to 90 correspond to minutes. Adjustment is progressive so that the time can also be set to any intermediate value between these numbers. At the end of the programmed cooking time, a buzzer will sound and switch off automatically after 4-5 seconds.

### THERMOSTAT KNOB

2

The cooking temperature is selected by turning the knob clockwise to the desired setting, between 50° and 250°C.

### THERMOSTAT INDICATOR LIGHT (RED)

3

When this light comes on, the oven is heating up.

When this light goes out, the preset heating temperature has been reached.

When the light flashes, the temperature inside the oven is steady.

### FUNCTION SELECTOR KNOB

4

Turn the knob clockwise or anti-clockwise to select a function from the following options:  
(See 8. COOKING WITH THE OVEN).

STATIC OVEN FUNCTION

LARGE GRILL FUNCTION

FAN-ASSISTED BOTTOM FUNCTION

LARGE FAN-ASSISTED GRILL FUNCTION

FAN-ASSISTED STATIC FUNCTION

ECO FUNCTION

## 7. USING THE OVEN

### 7.1 Before using the appliance

- Remove any labels (apart from the technical data plate) from trays, dripping pans and the cooking compartment.
- Remove any protective film from the outside or inside of the appliance, including from accessories such as trays, dripping pans, the pizza plate or the base cover.
- Before using the appliance for the first time, remove all accessories from the oven compartment and wash them as indicated in "9. CLEANING AND MAINTENANCE".

**Heat the empty appliance to the maximum temperature** in order to remove any manufacturing residues which could affect the food with unpleasant odours.

### 7.2 General Description

#### 7.2.1 Oven runners

The oven features **4 runners** for positioning trays and racks at different heights. The insertion heights are numbered from the bottom upwards (see figure).

### 7.2.2 Cooling system

The appliance is equipped with a cooling system which comes into operation as soon as a cooking function starts. The fan causes a steady outflow of air from above the door which may continue for a brief period of time even after the oven has been turned off.

### 7.2.3 Oven inside lights

The oven lights come on when the door is opened (only on some models) or any function is selected, except for  (where present).

## 7.3 Warnings and general advice for usage

**All cooking operations must be carried out with the door closed.**

During cooking, do not cover the bottom of the oven with aluminium or tin foil and do not place pans or oven trays on it as this may damage the enamel coating. If you wish to use greaseproof paper, place it so that it will not interfere with the hot air circulation inside the oven.

For the best cooking results, we recommend placing cookware in the centre of the rack.

To prevent any steam in the oven from causing problems, open the door in two stages: half open (5 cm approx.) for 4-5 seconds and then fully open. To access food, always leave the door open as short a time as possible to prevent the temperature in the oven from falling and ruining the food.

To prevent excessive amounts of condensation from forming on the internal glass, hot food should not be left inside the oven for too long after cooking.

## 8. COOKING WITH THE OVEN

### STATIC:

As the heat comes from above and below at the same time, this system is particularly suitable for certain types of food. Traditional cooking, also known as static or thermal radiation cooking, is suitable for cooking just one dish at a time. Perfect for all types of roasts, bread and cakes and in any case particularly suitable for fatty meats such as goose and duck.

### GRILL:

The heat coming from the grill element gives perfect grilling results, especially for thin and medium thickness meat and, in combination with the rotisserie (when present), it allows the food to be browned evenly at the end of cooking. Perfect for sausages, ribs and bacon. This function enables large quantities of food, particularly meat, to be grilled evenly.

### FAN-ASSISTED BOTTOM:

The combination of the fan with just the lower heating element allows cooking to be completed more rapidly. This system is recommended for sterilising or for finishing off the cooking of foods which are already well-cooked on the surface, but not inside, which therefore need a little more heat. Perfect for any type of food.

### FAN-ASSISTED GRILL:

The air produced by the fan softens the strong heatwave generated by the grill, giving perfect grilling results even with very thick foods. Perfect for large cuts of meat (e.g. shin of pork).

### FAN-ASSISTED STATIC:

The operation of the fan, combined with traditional cooking, ensures uniform cooking even with complex recipes. Perfect for biscuits and cakes, even when simultaneously cooked on several levels. (For multiple-level cooking, you are advised to use the 2<sup>nd</sup> and 4<sup>th</sup> runners.)

### ECO:

Using the grill and the bottom heating element plus the fan is particularly suitable for cooking small quantities of food, as it provides low energy consumption.

## 8.1 Cooking advice and instructions

---

### 8.1.1 General advice

For cooking on several levels, we recommend using a fan-assisted function

(  ) to achieve uniform cooking at all heights.

In general, it is not possible to shorten the cooking times by increasing the temperature (the food could be well-cooked on the outside and undercooked on the inside).

### 8.1.2 Advice for cooking meat

Cooking times, especially for meat, vary according to the thickness and quality of the food and to consumer taste.

We recommend using a meat thermometer for meat when roasting it. Alternatively, simply press on the roast with a spoon: if it is hard, it is ready; if not, it needs another few minutes cooking.

### 8.1.3 Advice for cooking desserts and biscuits

- Use dark metal moulds for desserts: they help to absorb the heat better.
- The temperature and the cooking duration depend on the quality and consistency of the dough.
- Check whether the dessert is cooked all the way through: at the end of the cooking time, put a toothpick into the highest point of the dessert. If the dough does not stick to the toothpick, the dessert is cooked.
- If the dessert collapses when it comes out of the oven, on the next occasion reduce the set temperature by about 10°C, selecting a longer cooking time if necessary.

### 8.1.4 Advice for defrosting and proving

- We recommend positioning frozen foods in a lidless container on the first runner of the oven.
- The food must be defrosted without its wrapping.
- Lay out the foodstuffs to be defrosted evenly, not overlapping.
- When defrosting meat, we recommend using a rack positioned on the second runner with the food on it and a tray positioned on the first runner. In this way, the liquid from the defrosting food drains away from the food.
- The most delicate parts can be covered with aluminium foil.
- For successful proving, a container of water should be placed in the bottom of the oven.

## 8.1.5 Advice for cooking with the Grill and the Fan-assisted grill

- Using the Grill function , meat can be grilled even when it is put into the oven cold; preheating is recommended if you wish to change the effect of the cooking.
- With the Fan-assisted grill function , however, we recommend that you preheat the oven before grilling.

We recommend placing the food at the centre of the rack.

## 8.2 To save energy

---

To save energy during use of the appliance, the following instructions may be followed:

- Stop cooking a few minutes before the time normally used. Cooking will continue for the remaining minutes with the heat which has accumulated inside the oven.
- Reduce any opening of the door to a minimum to avoid heat dispersal.
- Use the ECO function for cooking on a single runner.

Keep the inside of the appliance clean at all times.

## 8.3 Cooking process information table

DISHES	WEIGHT	FUNCTION
<b>FIRST COURSES</b>		
LASAGNE	3 kg	Static
OVEN-BAKED PASTA		Static
<b>MEAT</b>

## 9. CLEANING AND MAINTENANCE

**NEVER USE A STEAM JET FOR CLEANING THE APPLIANCE.**

We recommend the use of cleaning products distributed by SMEG.

### 9.1 Cleaning stainless steel

To keep stainless steel in good condition it should be cleaned regularly after use. Let it cool first.

### 9.2 Ordinary daily cleaning

To clean and preserve the stainless steel surfaces, always use **only** specific products that do not contain abrasives or chlorine-based acids.

**How to use:** pour the product onto a damp cloth and wipe the surface, rinse thoroughly and dry with a soft cloth or a microfibre cloth.

### 9.3 Food stains or residues

Do not use steel sponges or sharp scrapers as they will damage the surface.

Use normal non-abrasive products and a wooden or plastic tool if necessary. Rinse thoroughly and dry with a soft cloth or a microfibre cloth.

Do not allow residues of sugary foods (such as jam) to set inside the oven. If left to set for too long, they might damage the enamel lining of the oven.

### 9.4 Cleaning the door glazing

The glass in the door should always be kept thoroughly clean. Use absorbent kitchen roll; remove stubborn dirt with a damp sponge and an ordinary detergent.

Do not use abrasive or corrosive cleaners for cleaning the door glazing. (e.g. powder products, oven-cleaner sprays, stain removers and metal scouring pads).

Do not use rough or abrasive materials or sharp metal scrapers to clean the oven's glass doors since they may scratch the surface.

## 9.5 Cleaning the inside of the oven

For the best oven upkeep, clean it regularly after having allowed it to cool.

- Take out all removable parts.
- Clean the oven racks with hot water and non-abrasive detergent. Rinse and dry.
- For easier cleaning, the door can be removed (see “10.2 Removing the door”).

The oven should be operated at the maximum temperature for about 15-20 minutes after the use of specific products, to burn off the residues left inside the oven.

## 10.EXTRAORDINARY MAINTENANCE

The oven may require extraordinary maintenance or replacement of parts subject to wear such as gaskets, bulbs, etc. The following instructions describe how to carry out these minor maintenance operations.

**Before any intervention that requires access to live parts, disconnect the power supply of the appliance.**

### 10.1 Replacing the light bulb

If a light bulb needs to be replaced because it is worn or burnt out. Remove the bulb cover using a tool (e.g. a screwdriver).

Remove the bulb by sliding it out as shown.

**On some models only:** the bulbs are halogen bulbs, so **do not touch them directly with your fingers**, wrap them in an insulating material.

Replace the bulb with one of the same type (25W). Replace the cover correctly, so that the moulded part of the glass is facing the door.

Press the cover down as far as it will go so that it attaches completely to the bulb support.

## 10.2 Removing the door

Open the door completely.  
Insert two pins into the holes indicated **A** in the two hinges towards the back of them until they engage.

Grasp the door on both sides with both hands, lift it forming an angle of around 30° and remove it.

To reassemble the door, put the hinges in the relevant slots in the oven, making sure that grooved sections **C** are resting completely in the slots. Lower the door and once it is in place remove the pins from the holes in the hinges.

### 10.3 Removing the door seal

---

To permit thorough cleaning of the oven, the door seal may be removed. There are fasteners on all four sides to attach it to the edge of the oven. Pull the edges of the seal outwards to detach the fasteners.

### 10.4 Removing the internal glass panels

---

The glass in the door should always be kept thoroughly clean. To facilitate cleaning, it is possible to remove the door (see 10.2 Removing the door) and place it on a canvas, or open it and lock the hinges in order to extract the glass panels.

The glass panels of the door can be completely removed by following the instructions provided below.

Warning: before removing the glass panels, make sure that at least one of the door's hinges has been locked in the open position as described in "10.2 Removing the door". This operation may have to be repeated during the glass removal process if the door is accidentally freed.

1

## Removing the internal glass panel:

- Remove the internal glass panel by pulling it upwards, following the movement indicated by the arrows. Doing this detaches the 4 pins attached to the glass from their slots in the oven door.

2

## Removing the intermediate glass panels (on some models only):

- Some multifunction models have an intermediate glass panel. Remove the intermediate panel by lifting it upwards.

3

## Cleaning:

- It is now possible to clean the external glass panel and the panels removed previously. Use absorbent kitchen roll. In the case of stubborn dirt, wash with a damp sponge and neutral detergent.

4

## Replacing the glass panels:

- Replace the panels in the reverse of the order in which they were removed.
- Reposition the internal glass panel, taking care to centre and insert the 4 pins attached to the glass into their slots in the oven door by applying slight pressure.

## 11. INSTALLING THE APPLIANCE

### 11.1 Electrical connection

The identification plate bearing the technical data, serial number and brand name is visibly positioned on the appliance.

Do not remove this plate for any reason.

The appliance must be connected to earth in compliance with electrical system safety regulations.

If a fixed connection is being used, fit the power line with an omnipolar circuit-breaker in accordance with the installation rules, located in a position which is easy to reach and near the appliance.

If a plug and socket connection is being used, make sure that the plug and socket are compatible. Avoid use of adapters and shunts as these could cause overheating and a risk of burns.

**Operation at 220-240 V~:** use a H05V2V2-F type **220-240V~** three-core cable (3 x 1.5 mm<sup>2</sup>).

The end to be connected to the appliance must have an earth wire (yellow-green) at least 20 mm longer than the others.

**WARNING:** The values indicated above refer to the cross-section of the internal conductor.

## 11.2 Cable replacement

Should the supply cable need replacing, remove the back guard by unscrewing the screws to gain access to the terminal.

Replace the cable. The cable cross-section must be no less than  $1.5 \text{ mm}^2$  (3 x 1.5) (see 11.1 Electrical connection).

Make sure that the cables (for the oven or any hob) follow the best route in order to avoid any contact with the oven.

**WARNING:** The tightening torque of the screws of the terminal supply wires must be **1.5 - 2 Nm**.

### 11.3 Positioning the oven

Never use the oven door to lever the oven into place when fitting. Avoid exerting too much pressure on the oven door when open.

We recommend installing the oven with the help of a second person.

The base on which the oven is resting must be complete as shown in the illustrations below.

The oven is designed for mounting into any piece of furniture as long as it is heat-resistant (90°C).

Proceed according to the dimensions shown in figures **1**, **2** and **3**.

For installing under a work top, follow the dimensions given in figures **1** and **2**.

For installing under a work top with combined cooking hobs, ensure a minimum clearance from any side walls of at least 110 mm.

When installing in tall units, comply with the dimensions shown in figures **1** and **2**, bearing in mind that the top/rear of the unit must have an opening 35-40 mm deep.

Remove the screw covers on the frame and screw in the 2 screws **A** (fig. 5) to fix the appliance to the unit. Replace the screw covers. For installing beneath a countertop hob, allow for a rear and bottom clearance as shown in figure **1** (ref. **F**).

See the relevant instructions for fitting and securing the appliance.
